4. TOKEN SALE

4.1 In consideration of payment of the Contributions paid during our Token Sale, the Company will allocate and pay the number of Tokens Contributed into Your Wallet from Our Wallet after the closing of the Token Sale.

4.2 The Company will conduct a public sale of Tokens (i.e. the **Token Sale**), which will begin on 29/10/2021 (the **Launch Date**) and end on 30/10/2021 (**Availability Period**).

4.3 Tokens shall be available during the Availability Period, after which no more tokens will be created.

Contribution Failure

4.4 In the event that Contributions of less than \$1,000,000 are received in total from the Token Sale, this shall result in a withdrawal of the Token Sale (**Contribution Failure**) and the Token Sale shall be abandoned, no Tokens shall be issued and all Contributions shall be returned to you in full and final settlement of any obligations related to the Token Sale and your intention to acquire Tokens. These Terms shall terminate immediately upon return of your Contribution to Your Wallet.

4.5 These Terms shall terminate immediately upon return of your Contribution to Your Wallet.

4.6 If we have not received the payment of the full Contribution to Our Wallet within [24] hours of the time that you receive the payment instructions, we reserve the right to void your purchase request and refuse to accept your purchase of Tokens. For the avoidance of doubt, the Contribution will be deemed to be paid in full once we have received three (3) network confirmations of the transaction. We reserve the right, in

our sole discretion, to modify any of the timelines described herein to account for network congestion or other technical challenges.

- 4.7 You must make your Contribution by sending the correct quantity of USDT to the unique address displayed to you via the sale portal. Your purchase is not guaranteed until we receive the entire amount of the Contribution.

Delivery of Tokens

- 4.8 We will deliver the quantity of Tokens you purchase by the later of:
- 2 hours after the Availability Period ([although we may extend the delivery deadline for up to two (2) additional days if necessary to address any unforeseen technical difficulties]), or
 - [one (1) week after you have provided a complete and accurate details of Your Wallet].

Possible Migration of Tokens.

- 4.9 Tokens are being created as ERC20 tokens on the Ethereum protocol. We reserve the right to migrate the ERC20 based Tokens (**Pre-existing Tokens**) to another protocol and to generate replacement Tokens on the new protocol (**Replacement Tokens**) in the future, should we determine, in our sole discretion, that doing so is necessary or useful to the operation of the Network.
- 4.10 Should we decide to migrate the Tokens, we may no longer provide support for the Pre-existing Tokens relating to the Network except with respect to the migration process. Although we do not at this time anticipate that it will require any Pre-existing Tokenholders to convert their Pre-existing Tokens to Replacement Tokens, we anticipate there will be significant incentives for Pre-existing Tokenholders to do so, since the practical utility of Pre-existing Tokens will likely diminish rapidly once the Replacement Tokens are created and in use by a significant portion of Network participants. Accordingly, you acknowledge and agree that in order for you to continue to participate in the Network or obtain utility from the Tokens you may need to convert the Tokens you purchase during the Sale to Replacement Tokens in the future.
- 4.11 Should we decide to migrate the Tokens, we will notify you via the email address you provided to us at the time of the Sale. You are solely responsible for updating us should your contact information change and we accept no liability for your failure to do so.
- 4.12 You understand and acknowledge that, as the Tokens may be smart-contract based, their functionality is dependent on the ETH blockchain Smart Contract System (SCS): no other document or communication may modify or add any additional obligations or covenants for the Company beyond those outlined in these Terms. In the event of any conflict between the SCS and these Terms, these Terms shall take precedence and any necessary changes to the SCS or Token shall be made

accordingly. In certain circumstances, this may require Tokens to be entirely re-issued in substitution for the defective SCS or Tokens.

- 4.13 You agree that you shall have no further claims against the Company in respect of their support of the Network or the Token Sale in respect of any support, contribution or advice provided to the Company or Released Parties save for as detailed in these Terms and that receipt of your Tokens will constitute full performance of any promises, representations, contracts or statements made by the Company or any Released Parties in respect of the same.

- (b) We may assign any of our rights under these Terms or transfer all of our rights or obligations by novation to any member of the Group or the Company or transfer all our rights or obligations by novation to any member of the Group or the Company.

14.5 **Governing Law:** these Terms (including any variation or modification thereto) shall be deemed executed in Gibraltar and shall be governed by and construed in accordance with the laws of Gibraltar without giving effect to conflicts of law principles. You irrevocably agree that, subject as provided below, the courts of Gibraltar shall have exclusive jurisdiction to determine any claim, dispute or matter arising out of, or in connection with, or concerning these Terms or its enforceability and you waive any objection to proceedings in such courts on the grounds of venue or on the grounds that proceedings have been brought in an inconvenient forum. Nothing in this Section shall limit the right of us to take proceedings against you in any other court of competent jurisdiction, nor shall the taking of proceedings in any one or more jurisdictions preclude the taking of proceedings in any other

jurisdictions, whether concurrently or not, to the extent permitted by the law of such other jurisdiction.

- 14.6 **Severability:** whenever possible, each provision of these Terms will be interpreted in such a manner as to be effective and valid under applicable law but, if any provision of these Terms is held to be invalid, illegal or unenforceable in any respect, such provision will be ineffective only to the extent of such invalidity, or unenforceability, without invalidating the remainder of these Terms or any other provision hereof.
- 14.7 **Entire Agreement:** these Terms embody the complete agreement and understanding of the parties hereto with respect to the subject matter hereof and supersedes any prior or subsequent oral or written agreement or understanding between the parties in relation to such subject matter save in respect to the terms of the Token Sale entered into by the Contributor that shall remain in full force and effect.
- 14.8 **Reliance & Waiver:** each of the parties acknowledges and agrees that in entering into these Terms, it has not relied on any statement, representation, guarantee warranty, understanding, undertaking, promise or assurance (whether negligently or innocently made) of any person (whether party to these Terms or not) other than as expressly set out in these Terms. Each party irrevocably and unconditionally waives all claims, rights and remedies that, but for this Section, it might otherwise have had in relation to any of the foregoing. Nothing in this Section shall limit or exclude any liability for fraud.
- 14.9 **Third-Party Rights:** except insofar as these Terms expressly provides that a third party may in their own right enforce a term of these Terms, a person who is not a party to these Terms has no right under local law or statute to rely upon, or enforce, any term of these Terms but this does not affect any right or remedy of a third party that exists or is available apart from under that local law or statute.
- 14.10 **No Waiver:** no delay, neglect or forbearance by us in enforcing any provision of these Terms shall be a waiver by, or in any way prejudice any right, we have under these Terms.

Schedule A

Risk Factors

1. SOME MATERIAL RISK FACTORS

Contributors are aware of the many risks involved in the purchase, use and sale of tokens and the token sale process. We have outlined below some of the material risks that are obvious to the Company and persons involved in the Token Sale and Network project (including Released Parties):

- 1.1 **Early Stage Technology.** The Token will be used to develop a Network that is based on, or in some way involved with, distributed ledger technologies (**DLT**). You understand and accept that the use of DLT Tokenised stores of value is highly experimental. Participation in the proposed Token Sale and Network project therefore represents a very high risk to Contributors. The Company will invest in software and other technologies and that in all cases these technologies and businesses will still be in an early development stage and unproven, and there is an inherent risk that the software, technologies and related businesses invested in by the Company could be unfit for their intended purpose and/or not have the value expected.
- 1.2 **Cryptocurrency.** The Company may wish to store or convert cryptocurrency contributions into one or more fiat and/or alternative cryptocurrencies and there could be significant difficulties in making and managing such cryptocurrencies and funds including relating to the lack of ready convertibility between fiat currencies, cryptocurrencies and Tokens and the difficulty in being able to deal with such assets via traditional market counterparties and intermediaries. If the value of cryptocurrencies fluctuate unfavourably during or after the Token Sale, we may not be able to fund development, or may not be able to develop or maintain the Network in the manner that is intended. In addition to the usual market forces, there are several potential events which could exacerbate the risk of unfavourable fluctuation in the value of cryptocurrencies, including but not limited to another DAO-like attack on the Ethereum network; or significant security incidents or market irregularities at one or more of the major cryptocurrency exchanges.
- 1.3 **Main Protocol.** Many of the Network project technologies including the Token will, at least initially, be based on the Bitcoin and the Ethereum protocols. Any malfunction, breakdown, forking or abandonment of these protocols may have a material adverse effect on the Network or the Tokens. Moreover, advances in cryptography, or technical advances such as the development of quantum computing, could present fundamental risks to the value of such protocols and the Network.
- 1.4 **Risk of software weaknesses:** You understand and accept that the Network and the Tokens, the Contribution software and other involved software and technology and technical concepts and theories are still in an early development stage and unproven, and there is no warranty that the process for receiving, use and ownership of Tokens will be uninterrupted or error-free and there is an inherent risk that the software, Network, Tokens and related technologies and theories could contain weaknesses,

vulnerabilities or bugs causing, inter alia, the partial or complete: loss of Tokens; inability to use Tokens; and/or lack of usefulness of Tokens.

- 1.5 **Risk of blockchain mining attacks:** You understand and accept that, as with other public blockchain based systems that depend upon independent miners, the Network may be susceptible to mining attacks including, but not limited to, double-spend attacks, majority mining power attacks, “selfish-mining” attacks, and race condition attacks. Any successful attacks present a risk to the Network, expected proper execution and sequencing of Tokens transactions, and expected proper execution and sequencing of software computations.
- 1.6 **Risk of loss of your credentials:** You understand and accept that if your Wallet credentials are lost or stolen, the obtained Tokens associated with the Contribution will be unrecoverable and will be permanently lost. A private key, or a combination of private keys, is necessary to control and dispose of Tokens stored in your Wallet. Accordingly, loss of requisite private key(s) associated with your Wallet will result in loss of such Tokens. Moreover, any third party that gains access to such private key(s), including by gaining access to login credentials of a hosted Wallet service you use, may be able to misappropriate your Tokens. Any errors or malfunctions caused by, or otherwise related to, the Wallet you choose to receive and store Tokens, including your own failure to properly maintain or use such Wallet, may also result in the loss of your Tokens. Your failure to precisely follow the procedures set forth herein for buying and receiving Tokens, including, for instance, if you provide an incorrect Wallet address, or provide an address that is not ERC20 compatible, may result in the loss of your Tokens.
- 1.7 **Cybercrime.** The acquisition and management of cryptocurrencies and Tokens is inherently subject to the risk of cybercrime that is difficult to manage and mitigate. This may result in concerted attempts, and even successful attempts, to hack the Network, Token Sale process and the Sites and software and wallets used to manage contributions received in respect of Tokens and other software or technology components and to defraud Contributors and the Company. The Company and the Token Sale may be subject to unauthorised access, hacking and/or theft of some of cryptocurrency and Token assets and it may not be possible to successfully insure against the same at a reasonable price or at all. The Company is not required to insure the assets of the Company and does not intend to insure the same. Any unauthorised access or cybercrime may result in theft or loss or inability to access Contributions, impacting the ability to issue Tokens, the value of Tokens and may also impact the ability to develop and launch the Network.
- 1.8 **Failure or Abandonment.** The Token Sale event itself or the Network project may be fully or partially abandoned or required to be restructured for a number of reasons or remain technologically or commercially unsuccessful, or be shut down for many reasons including e.g., lack of interest from industry and/or the public, changes in law or regulatory issues, lack of funding, lack of commercial success or prospects (e.g. caused by competing projects). There is no assurance that any Tokens or rights to Token acquired by Contributors will have the value expected or any value at the time of realisation. You therefore understand and accept that the Contribution and/or the allocation, use and ownership of Tokens, carries significant risks that could lead to the

Tokens being unusable or valueless particularly as a means to exchange information and services with other Network participants.

- 1.9 **Regulatory risk:** You understand and accept that DLT and blockchain technology allows new forms of interaction and that it is possible that certain jurisdictions will apply existing regulations on, or introduce new regulations addressing, Blockchain technology based applications, which may be contrary to the current setup of the Contribution process and which may, inter alia, result in substantial modifications of the Network and Token utility including potential loss of Tokens for the Contributor. There is a risk that the offer and/or use of the Tokens could be prohibited under applicable securities law. The Company or any related entity may cease operations in a jurisdiction in the event that regulatory actions, or changes to law or regulation, make it illegal to operate in such jurisdiction and/or use the Tokens or make it commercially undesirable to obtain the necessary regulatory approval(s) to operate in such jurisdiction.
- 1.10 **Risk of uninsured losses:** Tokens do not represent deposits and are not subject to any statutory or private insurance unless you specifically obtain private insurance to insure them. Thus, in the event of a loss normally there is no public insurance in place or private insurance arranged by the Company, to offer recourse to you.
- 1.11 **Risk of governance failure:** Tokens confer no governance rights of any kind with respect to the Network or Company and all decisions involving Company's products or services or that of any subsidiary company within the Network or the Company itself will be made by the Company at its sole discretion, including, but not limited to, decisions to discontinue its products or services on the Network, or to sell or liquidate the Company. These decisions could adversely affect the Network and the utility of any Tokens you own.
- 1.12 **Risk of a lack of a suitable legal remedy:** This Token sale is not structured as an offer of securities or a promotion, invitation or solicitation for investment purposes. The terms applicable to unregulated contributions are not normally subject to financial services offering requirements including in respect of documentation or prospectus formats that are must meet certain standards required by law. For unregulated Token offerings that do not represent equity, shares, units, royalties or right to capital, profit or income in the network or software or in the entity that issue Tokens and/or any other company or intellectual property associated with the network, or any other public or private enterprise, corporation, foundation or other entity in any jurisdiction. Unregulated Token sales are not therefore intended to represent a security or similar legal interest. The impact on Contributors for investing in unregulated Tokens include that there is no independent review or oversight required by law, accounts of Token offerors may not be subject to audit requirements. In the event of a dispute as to whether (i) Contributions have been appropriately used to meet any legally binding representations made in any Token sale documentation (ii) the Network or Tokens have been developed within the scope of the legally binding representations or function as represented; (iii) the terms and conditions of the Token sale or exchange have been breached (iv) or any other potential legal claim against a Token issuer or any related third parties (**Respondents**), it may prove very difficult and costly for Contributors to assert their legal rights in their home jurisdiction (based on applicable law and jurisdiction and enforcement issues) or in

the jurisdiction of the Respondents and this may dissuade Contributors from asserting their legal (including contractual and statutory) rights. In addition, even if a claim is brought it may prove difficult to distinguish between legally binding and enforceable contractual representations, warranties and terms from mere statements of the intended potential future use of a Token that are not sufficiently certain legally binding promises. Terms and conditions of Token sales will also normally take significant care to warn Contributors about the many risks involved in Tokens, Token sales, and the viability of the underlying networks on which Tokens are intended to be used and this may also make it very difficult to bring a claim successfully.

- 1.13 **Contributors** and all market participants are encouraged to do their own research and consider the following helpful risk warnings and advice on this sector, and particularly the regulatory status of token sales and the risk of loss of value and lack of statutory protection that have been issued by regulators in a number of jurisdictions.
